Ivan Mireles is a technical advisor who specializes in patent applications pertaining to computer software, computer hardware, and datacenter technologies. In the past five years, Ivan has written, developed and contributed to patent applications and patent prosecutions pertaining to data storage, machine learning, form developing, virtual computing and cloud computing for both small businesses and Fortune 50 companies alike. His practice focusses on computing design and cloud storage.

Ivan received his Bachelor of Science in Engineering Science from Trinity University, where he was selected to work with a Faculty Member in improving a parking Space Counter for one of the school's parking lots using extensive programming, machine learning and technical analysis. Ivan is a certified Texas Engineer-in-Training.
