Brady Burns is a Technical Advisor in the Intellectual Property Section.

Brady received his Bachelor's degree in Engineering Science with an emphasis in Electrical Engineering. While obtaining his degree, he had the opportunity to work under the Engineering Science Department Chair on several major projects including the emergency water station project commissioned by International Red Cross. For this project, he focused GSM cellular networking, satellite communication, power systems, and electrical software. Additionally, he worked and maintained several of the 3D printers that were in the Engineering Department. Finally, he prepared the electrical design of a motorized library cart that included power steering, self-propulsion, and electrically mobile shelving.
